To Whom it May Concern,

I am pleased to write in recommendation of Lea Nixon as she pursues her next step as aligned with her future professional goals. I have had the privilege of supervising Lea during her time working within our student facility and event operations environment. In that time, she has consistently distinguished herself as a reliable, thoughtful, and solutions-oriented professional. Lea also has proven to be a self-starter who is not only capable of managing complex responsibilities, but who actively seeks out opportunities to improve systems, support her peers, and enhance the overall user experience.

One of Lea's strongest attributes is her ability to analyze problems and take initiative in addressing them. Whether working through troubleshooting a problem with-in our facility or working directly with a patron needing assistance, she demonstrates a strong capacity to assess situations critically and implement effective, efficient solutions. Lea is not afraid to ask questions when needed and approaches learning with intention, ensuring that she fully understands processes so she can both execute and improve them. This mindset has made her an invaluable contributor in fast-paced, high-demand environments where both accuracy and adaptability are essential.

Lea also brings a strong customer service mindset to all that she does. She consistently prioritizes the experience of our constituents, balancing organizational expectations with empathy and clear communication. In her role, she has demonstrated the ability to maintain high satisfaction outcomes while managing multiple competing priorities. More often than not she is faced with multiple issues simultaneously and she is able to work with her team to prioritize in a fast and consistent manor. Her work reflects not only technical competence but also a genuine commitment to accessibility, inclusivity, and user-centered design, all of which are qualities that align well with her academic focus in Computer Information Systems and cybersecurity.

In addition to her technical and analytical strengths, Lea is a dependable and collaborative team member. She communicates effectively, supports those around her, and contributes positively to team operations. She has demonstrated leadership through both formal and informal roles, helping guide team processes while remaining open to feedback and continuous growth. Her ability to remain composed under pressure while still delivering high-quality work speaks to her professionalism and strong work ethic.

Overall, Lea is a motivated and capable individual who brings together technical skill, curiosity, and a strong sense of responsibility. I am confident that she will make meaningful contributions in any role she pursues, particularly those that sit at the intersection of technology, user experience, and problem-solving. She has my full support and highest recommendation.

If you have any questions, please feel free to contact me.

Best regards,
